Designers, stop wasting your time worrying about BIM standards.

UNIFI helps design teams throughout the project lifecycle by providing a platform which increases efficiency for designers and improves visibility of model data for BIM managers.

Cloud-Based Libraries

Cloud-based libraries of your firm's approved BIM content allow designers to get back to doing what they enjoy most, designing.

Version Control

Built-in change management system ensures designers are using the latest and greatest BIM content from approved libraries.

Project Data

Review live Revit project data including quantities, family versions, and model health scores; all without opening Revit.

UNIFI Pro

Our cloud-based BIM content management system makes it easier for your team to find approved design assets.

- ✓ Unlimited Storage
- ✓ Automated Revit Version Upgrades
- ✓ Granular Permissions Control
- ✓ Multi-Platform: Revit, AutoCAD, Civil3D, MicroStation, & Rhino
- ✓ Open API for programmatic management of Revit families

Project Analytics

Review project data across your firm's entire portfolio in a web browser rather than within Revit.

- ✓ Customizable Model Health Scoring
- ✓ Discover Unapproved & Outdated Content
- ✓ Review Revit Model Errors and Warnings
- ✓ Historical Snapshots of Project Data as of Each Sync
- ✓ Prevents Crashes and Downtime Before They Happen
